

## Definition of Ready (DOR)

A user story is considered ready to be worked on in a sprint if it meets the following criteria:

- The story is written in a clear and concise format.
- The acceptance criteria are well-defined and unambiguous.
- The story is estimated and sized appropriately.
- Any dependencies or prerequisites for the story have been identified and addressed.
- The story has been reviewed and approved by the product owner.

**example of how this DOR could be applied to a user story:**

### **User Story:** Update User Profile

**As a registered user, I want to be able to update my profile information, so that my account reflects my current information.**

## **Definition of Done (DOD)**

**A user story is considered done if it meets the following criteria:**

- **The acceptance criteria have been fully met.**
- **The code has been reviewed and tested by at least one other team member.**
- **The code is well-documented and adheres to established coding standards.**
- **Automated tests have been written and executed to ensure the functionality of the code.**
- **Any necessary documentation or user guides have been created and reviewed.**
- **The code has been merged into the main branch and is ready for deployment.**
- **The story has been reviewed and approved by the product owner.**
- **Note that the DOD should be updated as needed throughout the project to ensure that it reflects the current standards and expectations of the team.**
